GIERRE SOLUTIONS

We are specialists in providing PET, PVC, PS and ABS **thermoformed packaging**. Thanks to our know-how and technical expertise we are able to offer you **customized solutions** that will protect your product and enhance its image. Our **production cycle** can be resumed in 5 steps:

1. enhancement of the product by studying **packaging design**.
2. development of the packaging **prototype** within few days.
3. design and fabrication of the equipment for production, our attention is focused on **optimization** of the relationship between **investment** and **cost of the packaging**.
4. **product packaging** with heat sealing and H.F. sealing plus potential elaboration of packaging graphic design.
5. **supply of equipment** (heat sealers, thermoformers, H.F. sealers, moulds and electrodes) for self-production of a high amount of packaging. Continuous assistance is guaranteed.
